

DEVELOPER DELIVERED SEWER DIVERSION

STEP 1

You submit your application on the portal.

Provide as much information as possible to help us understand your project.

We'll respond within 14 days and let you know if we have everything we need to review your application.

STEP 2

We'll issue technical approval.

As part of our approval, we'll confirm what fees are required.

You'll receive a response within 28 days from when your application becomes complete.

If we're unable to approve your proposals, we'll be in touch to let you know why and what you need to do next.

STEP 3

Enter into a diversion agreement.

You'll need to enter into a legal agreement with us before carrying out the diversion works and pay the relevant fees.

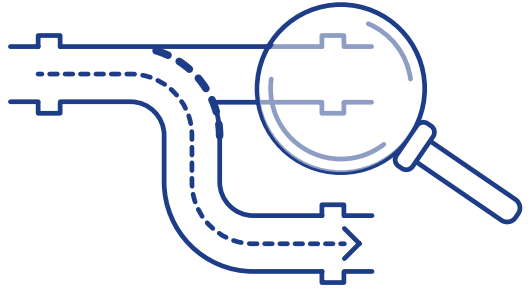

We'll draft this agreement for you to be signed by all parties.

STEP 5

Final adoption.

At the end of the agreed maintenance period and following final inspection we'll issue an adoption certificate. The diverted sewer will now become our responsibility to operate and maintain.

STEP 4

Carry out the diversion works

Once your diversion work is complete, get in touch to arrange an appointment with one of our team to make sure the diversion work is constructed to the required standards.

At this visit, they'll confirm if any remedial work is required before we can place the diverted sewer onto a maintenance period.
